

INNOVATIVE SOLUTIONS TO ENSURE
QUALITY, SAFETY AND SUSTAINABILITY
FOR ALL SPECTRUM OF INDUSTRIES

CUSTOMER SATISFACTION IS OUR COMMITMENT

DARLSCO INSPECTION SERVICES(DARLSCO) accredited by Dubai Accreditation Centre(DAC)/Emirates International Accreditation Centre(EIAC), Dubai for ISO/IEC 17020, ISO/IEC 17025 and ISO/IEC 17024 has been providing premium quality, safety and suitability solutions across the globe. We serve our clients with new and innovative technologies and have proven track records with 100 % customer satisfaction. The holistic solutions across the entire business lifecycle are arrived based on your operation and enable us to provide end to end services.

INSPECTION TESTING AND CERTIFICATION:

We independently and impartially perform inspection (Initial, periodic, Installation and exceptional) at every stage of your equipment, instruments, systems, process and procedures comply with regulation(s), code(s), requirement(s), manufacturer recommendation(s) and standard(s).

CALIBRATION:

We cater our clients in providing calibration of instruments and certification. The services are offered on-site to reduce the Turn Around Time(TAT) and to comply with quality assurance.

TRAINING:

We provide Health and Safety class room training courses. These courses are industry specific and ranges from foundation level through advanced courses to gain and continue your professional development. For several years, D A R L S C O has developed health and safety programs for clients and conducted training that helps workers understand making safe choices benefits them and their employers.

PERSONNEL CERTIFICATION:

We conduct examination and certify amusement ride operator included but not limited to Funfair Safety Officer, Funfair operation supervisor, Ride Operator, Ride/device attendant, Amusement equipment technician, Soft play area attendants, Skill games and arcade games attendants, Rescue and Evacuation Personnel to ensure quality and safety whilst operation of the ride for public use.

MONITORING AND REPORTING:

We provide environmental attributes monitoring and reporting included but not limited to ambient & indoor air quality, Flue gas and stack, water (drinking and potable) and waste water sampling, sound level monitoring and vibration. Our reporting standards conform to local requirement(s) and International standard(s).

DESIGN COMMISSIONING AND MAINTENANCE:

We customise water parks as per the customer requirement. The parameters considered are pool size, depth, Capacity and with scenic view. We install with high standard of safety with 1- 2 days TAT. We deploy divers for periodic maintenance to facilitate smooth operation.

AUDITS AND SYSTEMS CERTIFICATION:

We conduct EHS audits, customised risk assessment (qualitative and quantitative) to our customers. The hazard identification is conducted by walk-through survey of the facility to identify and list out the potential hazards in the following basic hazard categories included but not limited to Penetration, Impact, Chemical, Harmful dust, Compression (roll-over), Heat/cold, Light (optical) radiation and biological hazard.

TECHNICAL KNOW-HOW:

Our team of experts include scientist, engineers, professionals and technicians provide technical know-how and knowledge-based approach to complex problems. Our Research and Development (R&D) team works round the clock to identify and rectify our customers concern during design, installation, commissioning and operation.

TRUST WITH CLIENTS TOWARDS PASSION

Core Values

- D**edicated service to customer(s) / client(s)
- A**rriving solution to complex problem
- R**ealistic in approach and methodologies
- L**eaders in trend setting
- S**ystematic Approach and quality deliverables
- C**ohesion with statutory authorities and clients
- O**utreach to comply with QHSE requirements

CLIENTELE DATABASE

Sports, Leisure & Entertainment:

We provide Inspection services and ensure safety to public of all walks of life. The importance of safety initiated from design stage of the amusement ride/device and during operational phase. The Inspection and certification includes structural verification, NDT, PPE, electrical components and operator assessment. We cater to special client(s) requirement during Installation and commission Inspection especially water parks and comply to International standard(s) and local requirement(s).

Real Estate and Infrastructure:

We cater to client requirement during the concept design providing compliance studies included but not limited to Pre-feasibility studies and detailed project report. We inspect and certify the lifting equipment's, accessories, scaffolding and ensure at most safety. Key services include due diligence, engineering services, property management and violation and process optimization.

Manufacturing:

We carry out extensive quality verification for all types of manufacturing industry. The periodic inspection includes pressure equipment inspection, electrical system validation, lifting equipment's and accessories compliance, conveyance line (gas and water) verification to meet standard requirement(s), batch testing and product verification. In addition, key services are failure analysis, system verification and safety training.

Consumer Products and Retail:

We serve by and large people of customers specially in retail industry. Our calibration team cater to calibration of food preservation chambers including transport vehicles to verify the requirement(s). Key services include EHS auditing, compliance solutions, product testing and certification.

Automotive Services:

"World move on wheels". We inspect the automotive industry workshops, vehicle passing bay, washing jack, alignment machines, wheel balancing machines, spares and all other equipment that support the industry operation. The software are calibrated to ensure precise results.

Printing and Advertising:

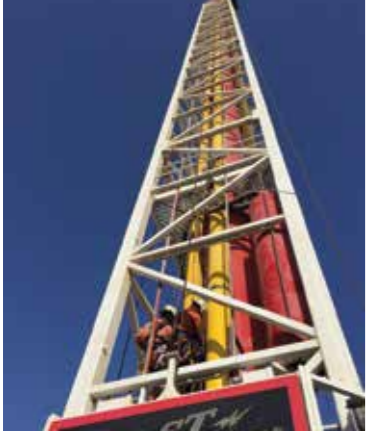

We provide our services with respect to equipment inspection, Flue gas monitoring, training and studies to strengthen the operation. The 5S survey and implementation is a tool to have workplace management. We identify hazards and documents risk assessment to mitigate the risk of accidents

Chemical and process:

We cater to the quality assurance and quality check in terms of verification of product verification, ensuring safety in pipeline, stacking, mobility, calibration of process chambers and storage facilities. Key services include design review, periodical and risk-based inspection, and process safety management.

Oil and Gas:

We are specialised in providing specialist engineering consultancy dedicated to providing naval architecture, structural design and analysis services to the marine, offshore, installation engineering, renewable energy sectors.

Urban Development and Environment:

We provide our innovative solutions during the design, construction and operation phase of the project. We inspect the lifting equipment, accessories, hazardous storage, EHS compliance, environmental attributes monitoring and reporting.

Renewable Energy:

We work with investors, promoters, operators, suppliers and authorities to ensure safety and reliability whilst increasing operational efficiency and global presence. The key services include engineering services, risk-based inspection, testing and Inspection services.

SIGN OF TRUST:

DARLSCO is privileged and respected as an Independent, confidential and Impartial symbol of quality, safety and sustainability. DARLSCO services included but not limited to third party endorsement, calibration and personnel certification as globally renowned organisation and its certification marks enable customers with greater market opportunities.
